

Pastures, shepherds and old flavors

Description

The magic Sienese hills offer us the possibility to know for a moment the **shepherds**, the **poetry of the pastures** and the **products** born from both. The pastors, people from simple beginnings, no less profound and thoughtful, tell the life, hope and love for nature. All of this is found in its cheese.

The experience is unique and consists of a visit to the stables in order to see the whole process of transformation, from the milk to cheese, and finish with a tasting of typical products of the farm from which one can enjoy the spectacular views of the hills of the **Val d'Orcia** and the town of **Montalcino**.
